

Pressure gauge Syphon Tube / Pipe Q Type / 304/316 Stainless Steel Round Ring /
6000 PSI 1/2 NPT BSPT Swivel Positionable / Pressure Gauge Snubber Syphon Tube

The products are necessary used in the instrument installation progress for industrial temperature controlling, which is applicable to install temperature-measuring components in the piping or devices, mainly used for the devices, such as: thermoelectric couples, armoured thermoelectric couple of thermal resistance, double-metal thermograph, surface thermoelectric couples, pressure thermograph and so on. There are many kinds of installation methods, for example, by threads, mounting by connectors, protective-sleeve inserting. There are so many advantages of the products as following: small size, compact installation, convenient maintenance, applicable for corrosive or non-corrosive fields.

-TW14 Pressure gauge Syphon Tube
